Project Demo Planning

Date	03 July 2026
Team ID	XXXXXX
Project Name	Smart Lender – Loan Eligibility Prediction Using Machine Learning
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the Smart Lender project, objectives, problem statement, and real-world use case.	2	Self
2	Solution Overview	Explain the system architecture, work flow, dataset, preprocessing, and machine learning models (Decision Tree, Random Forest, KNN, and XGBoost).	3	Self
3	Application Demonstration	Demonstrate the deployed Smart Lender web application on Render, enter applicant details, and generate both Approved and Rejected predictions.	5	Self
4	Feature Explanation	Explain the implemented features such as XGBoost model integration, Flask backend, responsive UI, input validation, and prediction result display.	3	Self
5	GitHub Repository, Documentation & Deployment	Show the GitHub repository structure, project documentation, and the live Render deployment.	2	Self
6	Conclusion & Future Enhancements	Summarize the project and discuss possible future improvements such as authentication, database integration, prediction history, and Explainable AI.	2	Self

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for automating loan eligibility prediction and the project objectives.
2	Solution Overview	Present the system architecture, project workflow, technologies used, preprocessing, and the XGBoost machine learning model.
3	Live Feature Demonstration	Open the deployed Smart Lender application on Render, enter sample applicant details, and demonstrate both Approved and Rejected prediction results.
4	GitHub Repository & Documentation	https://smart-lender-loan-eligibility-prediction-8448.onrender.com
5	Q&A Session	Answer questions related to the dataset, preprocessing, XGBoost model, Flask integration, deployment, accuracy, limitations, and future enhancements.
