Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want to know if I am eligible for a loan. • The loan approval process should be quick and easy. • I need a fair and transparent decision.	THINKS • Will my loan application be approved? • Is my income and credit history good enough? • How much loan amount can I get?
PERSONA NAME <i>(Role / User Type)</i> Loan Applicant (Bank Customer)	
DOES • Collects and enters personal and financial details. • Submits a loan application to the bank. • Checks the loan eligibility status and waits for approval.	FEELS • Anxious about loan approval and eligibility. • Hopeful if the prediction is positive. • Frustrated when the process is slow or unclear.
