

Demonstration of Proposed Features

Date	03 July 2026
Team ID	XXXXXX
Project Name	Smart Lender – Loan Eligibility Prediction Using Machine Learning
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Loan Eligibility Prediction	Predicts whether a loan application is Approved or Rejected using the trained XGBoost machine learning model.	Implemented	Yes	Working successfully
2	Applicant Information Form	Collects applicant details such as Gender, Marital Status, Education, Self-Employment Status, Applicant Income, Co-applicant Income, Loan Amount, Loan Amount Term, Credit History, Property Area, and Dependents.	Implemented	Yes	User-friendly interface
3	Machine Learning Model Integration	Integrates the trained model.pkl and scaler.pkl with the Flask application to generate real-time loan eligibility predictions.	Implemented	Yes	Prediction generated successfully
4	Responsive Web Interface	Provides a responsive interface using HTML5, CSS3, and JavaScript for desktop and mobile browsers.	Implemented	Yes	Supports desktop browsers
5	Result Display	Displays the loan eligibility prediction (Approved/Rejected) instantly after processing applicant information.	Implemented	Yes	Results displayed correctly
6	Project Documentation & GitHub Repository	Maintains complete project documentation, GitHub repository, and deployed application on the Render Cloud Platform.	Implemented	Yes	Repository submitted successfully

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
